Crocking	AATCC 8 Dry – 5 Wet – 45
Flame Resistance	Passes California Bulletin 117 BFD 1X-1 Boston Fire Dept. NFPA 260
Natural Markings	<p>All Martin Bratrud Leathers are genuine. As fine leather they bear characteristics of natural origin. These markings in no way detract from durability or performance; rather, they are an assurance of luxurious natural beauty and lasting value.</p> <p>There are also inherent fluctuations in grain throughout the hide and from hide to hide – hallmarks of quality in the finest leather.</p>
Maintenance	<p>Leather is a natural product that requires very little care. It is inherently resilient and durable needing little maintenance. In fact, the best maintenance for leather can be use. Occasional dusting with a dry cloth should be all that is necessary to clean and maintain it.</p> <p>Never use saddle soap, feeders, cleaners, polishes, oils, varnishes or ammonia. These products are not made for fine upholstery leather.</p> <p>A professional leather cleaning service may be consulted.</p>
